ABOUT ME

Full-Stack Software Engineer specializing in Java/Spring Boot and Next.js. As sole developer, shipped a production ticketing platform for Prime Bank serving 50–80 staff and 500–2,000 daily tickets — covering RBAC, SLA automation, and UAT through go-live. Comfortable owning a project end-to-end, from architecture to production.

EDUCATION

B.Sc. in Software Engineering Islamic University of Technology (IUT) (CGPA: 3.13/4.00)	<i>Aug 2022 – Present</i>
Higher Secondary School Certificate , Notre Dame College, Dhaka	<i>Jun 2019 – Feb 2021</i>
Secondary School Certificate , Ideal School and College, Motijheel	<i>2013 – 2019</i>

WORK EXPERIENCE

Reddot Digital Limited	<i>Oct 2025 – Jul 2026</i>
Software Engineer (Part Time)	<i>Mar 2026 – Jul 2026</i>
Software Engineer Intern	<i>Oct 2025 – Feb 2026</i>
• Lenden HelpDesk (Prime Bank ticketing portal; 500–2,000 tickets/day, 50–80 staff, 4 roles) Stack: Java 17, Spring Boot 3, Spring Security, JWT, Spring Data JPA, PostgreSQL, Cloudinary, Next.js 15, React 19, TypeScript, Tailwind CSS, Maven – Sole developer; resolved 80+ issues and shipped the portal, now running in production. – Built the full-stack app: Spring Boot REST API, PostgreSQL, and a Next.js/TypeScript frontend for ticketing and master-data management. – Replaced OTP login with username-password auth and built role-based access control for Super Admin, Admin, Call Center, and Ops Team workflows. – Built bulk ticket close/resolve with cross-page selection, cutting closing time from 10+ minutes to one click; fixed DataTable race conditions and made ownership team-based. – Engineered an SLA reporting pipeline with subcategory-based response/resolution times and an EscalationMatrix for PRE/POST breach alerts, replacing a manual spreadsheet process that cost team leads 1–2 hours/day; corrected CSV/Excel export headers. – Fixed critical attachment bugs, adding role-gated deletion and pre-submission removal. – Attended 7 client meetings, led UAT, and resolved critical feedback before go-live. • Khati – E-Commerce Platform (Backend Repo Frontend Repo) <i>Oct 2025 – Dec 2025</i> Stack: Java, Spring Boot, Spring Security, PostgreSQL, Next.js 15, TypeScript, Tailwind CSS – Solo-built a farm-fresh e-commerce platform: 4 Spring Boot microservices (Auth, User, Inventory, Order) behind an API Gateway, database per service, 27 REST endpoints. – Secured services with stateless JWT and role-based access (Admin, Manager, Customer), propagating tokens across services and blocking internal endpoints at the gateway. – Implemented the order workflow with stock validation against the Inventory service and automatic stock deduction and customer order-count updates on order confirmation. – Built the Next.js 15/TypeScript frontend (9 pages, 10 components): category browsing, cart, checkout, order tracking, and Admin and Manager dashboards.	

PROJECT EXPERIENCE

InstructFlow (GitHub Live Demo)	<i>Jul 2025 – Aug 2026</i>
<i>Full-Stack / AI Developer</i> Stack: Next.js 15, Vercel AI SDK, Gemini, MongoDB, NextAuth, Playwright	
• Built an AI prompt-engineering platform that turns a short scenario into a structured, ready-to-use prompt using Google Gemini via the Vercel AI SDK. • Designed a two-step generation pipeline: a Zod-validated generateObject call asks targeted clarifying questions for vague input, then streamText streams the final prompt in real time.	

- Added Google sign-in (NextAuth) and a MongoDB API for **prompt CRUD, public/private sharing**, and a feed with **debounced search by username, tag, and content**.
- Wrote 5 Playwright end-to-end tests covering authentication and prompt-generation flows.

CrypTau (GitHub | Live Demo)

Apr 2025 – Jul 2025

Full-Stack Developer | **Stack:** Next.js, Solidity, Hardhat, Ethers.js, Web3Modal, IPFS, Tailwind CSS

- Built and deployed an NFT marketplace on MegaETH testnet where users **mint, list, buy, and resell** via MetaMask.
- Wrote the Solidity ERC-721 contract (OpenZeppelin) with ownership checks, exact-price validation, a listing fee, and **automatic seller/marketplace payment splitting**.
- Integrated the **blockchain layer** with Ethers.js and Web3Modal (wallet, contract calls, **My NFTs and Listed NFTs** views) and **stored NFT assets on IPFS via Pinata**.
- Delivered a responsive Next.js and Tailwind UI (browse, details, create, resell, top creators) with an EmailJS contact form, hosted on Vercel.

DeliveryAnbi (GitHub)

Aug 2024 – Mar 2025

Android Developer | **Stack:** Kotlin, Android SDK, Firebase, SpeechRecognizer

- Developed a **hall-of-residence food delivery app** in Kotlin where users place orders and peers **accept and deliver** them (Pending → Accepted → Completed).
- Integrated **Firebase Authentication and Realtime Database** for login, **live order syncing**, and **real-time customer-courier chat** per order.
- Built an **in-app wallet** (deposit, withdraw, balance checks) with a **10% service charge**.
- Added **voice ordering** with Android SpeechRecognizer (e.g., “item Pizza, quantity 2”) and an order-history analyzer that suggests the user’s **most-ordered food**.

NikeDemo-Webapp (GitHub | Live Demo)

Mar 2024 – Apr 2024

Front-End Developer | **Stack:** React, Vite, Tailwind CSS

- Built a responsive Nike landing page from **8 reusable, data-driven sections** with an **interactive hero showcase** (React state) and a custom Tailwind theme.

TECHNICAL SKILLS

Languages: Java, Kotlin, TypeScript, JavaScript, Python, C/C++, C#

Back End: Spring Boot, Spring Security, Node.js, REST APIs, Microservices, API Gateway, JWT, MVC

Front End & Mobile: Next.js, React, Tailwind CSS, HTML/CSS, JSP, Android SDK

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Firebase

Blockchain & AI: Solidity, Hardhat, Ethers.js, Web3Modal, Vercel AI SDK, Gemini API

Tools & Core: Git, GitLab, Maven, IntelliJ IDEA, Postman, Playwright, OOP, DSA, Agile/Scrum

ACHIEVEMENTS

- **Top 10 Finalist** – CodeRush 2.0 Hackathon, IUT
- **300+ DSA Problems Solved** on Codeforces and LeetCode
- **World Rank 91 (Category O)** – Physics Brawl Online 2023

May 2025

CO-CURRICULAR ACTIVITIES

Assistant Executive Secretary (Internal Affairs), IUT Computer Society

Sep 2024 – Present

Events organized: CodeRush 2.0 (2025), IUT 11th National ICT Fest, CodeRush 1.0 (2023).

Provisional Secretary (Logistics), IUT Arts and Cultural Society

Aug 2024 – Present

Events organized: 2nd Intra IUT Arts and Cultural Exhibition, OIC Day Art Exhibition 2024.
